Jay Panchal

Business Analyst & Solutions Engineer

+91 9624287628 | panchalj481@gmail.com | jaypanchal.com | linkedin/PanchalJay

Summary

Business Analyst with strong experience in AI-driven workflow automation, requirement analysis, and scalable low-code solution engineering. Skilled in translating complex business operations into optimized digital workflows that reduce manual effort, accelerate decision-making, and improve process accuracy. Proven track record in delivering enterprise-grade automation systems end-to-end across HR, CRM, logistics, and manufacturing domains.

Skills

Business Analysis: Requirement Gathering, Process Mapping, BRD/FRD, User Stories, Acceptance Criteria, RCA, Change Management
Solutions Engineering: Workflow Automation, Rule Engine Design, System Configuration, Logic Building, Optimization, Integrations
Tools & Tech: SQL, Excel (Advanced), Jira, Confluence, REST APIs, Figma, Git
Soft Skills: Stakeholder Management, Client Communication, Problem Solving, Critical Thinking

Experience

Business Analyst Jun 2024 – Present
Neome.ai *Ahmedabad*

- **Delivered 100+ enterprise automation modules** (Leads, Visits, Quotations, Approvals, Dashboards, Data Management) used by 100+ users across multiple industries.
- **Automated 70% of manual operations** by designing validations, workflow rules, escalations, reminders, and event-driven triggers, reducing turnaround times significantly.
- **Led requirement discovery and documentation**—BRDs, FRDs, user stories, and workflow diagrams—aligning business needs with engineering and QA teams.
- **Accelerated implementation speed by 50%** through reusable components, standardized logic templates, and modular workflow patterns.
- **Owned UAT cycles and go-live execution**, resolving blockers, validating flows, and streamlining release planning across cross-functional teams.
- **Enabled data-driven decision-making** by designing automated dashboards and structured reporting workflows for operational visibility.

Frontend Development Intern Jan 2024 – Jul 2024
Brainybeam Info-Tech Pvt Ltd *Ahmedabad*

- Built foundational skills in Android development, REST API integration, MySQLite, and client-server workflow design.
- Strengthened technical depth to support engineering collaboration in automation and process optimization projects.

Development & Testing Trainee Jul 2023 – Aug 2023
QSpiders *Ahmedabad*

- Trained in Python, SQL, Web Development, and Manual Testing through an intensive software engineering program.
- Developed mini-projects involving data handling, API usage, and backend logic implementation.
- Gained practical SDLC exposure and improved debugging, documentation, and analytical skills.

Education

Gujarat Technological University 2024
Bachelor of Engineering (BE) *CGPA: 7.98*
